Commonwealth Computer Recycling, LLC, Announces Rebranding, Changes Name to CyberCrunch

CyberCrunch will continue to provide data destruction and e-waste disposal solutions across the nation

GREENSBURG, PA (February 14, 2017) — Commonwealth Computer Recycling LLC (CCR), a company offering a broad range of data destruction and e-waste disposal solutions, has announced that it has officially rebranded as CyberCrunch. In coordination with its new name, the company has also unveiled its new logo.

CyberCrunch has a groundbreaking method for recycling computers and electronics, using an approach that finds previously untapped value in e-waste. It delivers solutions like IT asset disposal, data destruction and universal waste management, among others.

Founded in 2011, the company has made a name for itself in the Mid-Atlantic region and works with a diverse client base, including the U.S. Department of Homeland Security, the FBI, large enterprise firms, nonprofit organizations and small and medium-sized businesses.

"Our goal is to provide nationwide data destruction and e-waste recycling solutions," said Serdar Bankaci, owner of CyberCrunch. "There are not many cost-effective solutions available to small and medium-sized businesses. CyberCrunch solves this problem by providing various secure disposal options, including onsite shredding, off-site shredding and mail-back destruction with video recording."

CyberCrunch is R2 certified and a member of the National Association for Information Destruction (NAID), allowing the company to handle sensitive data and equipment per the most stringent industry standards.

About CyberCrunch
CyberCrunch is an innovator when it comes to data destruction and e-waste disposal, finding previously untapped value in e-waste that allows it to provide customers with the best service possible. The company serves Fortune 1000 companies across the country, with solutions that include data destruction, IT asset disposal and e-waste compliance. The company, which is R2 certified and a member of the National Association for Information Destruction (NAID), handles clients' hardware and sensitive data per the highest industry standards.
