

3Srecycling.com

August 6, 2015

On Friday, July 31, 2015 3S International, LLC temporarily suspended its daily operations in Tinley Park, IL and Taylor, MI. In order to allow 3S to strategically reposition the company to better meet the current and future needs for the recycling of flat panel displays and other mercury containing electronic devices, the company filed for protection under Chapter 11 on Thursday, August 6, 2015. 3S International continues to maintain its North American exclusivity of BLUBOX and is looking forward to continuing our existing relationships and developing new partnerships to expand its service and reach into new markets. BLUBOX is the most advance and only fully automated systems that can safely extract hazardous substances from electronic equipment and lamps while separating the material into fractions for further processing and recycling.
