

BitRaser Data Eraser & Device Diagnostics Powers Up For ITADs

Stellar announced the new eraser and diagnostic BitRaser products for hard drives & mobile devices that would tremendously boost efficiency and employee productivity of an ITAD operation. The brand-new product versions would be showcased for the first time at eScrap 2019 conference in Orlando [booth 621]

The new features include faster drive eraser module that can help save up-to 23%-time, a 'Cloud console' that allows multi-location deployment, monitoring, along-with anytime access to erasure reports.

The upgraded network management console is designed for a tighter integration with ERP platforms to help ITAD business operations achieve a faster turnaround and increase employee productivity.

The mobile variant now has a unified interface that can handle simultaneous erasure and diagnostic of mobile devices. It also offers wider set of diagnostic tests and improved reporting.

"The upgraded BitRaser product design helps our ITAD customer experience faster inventory processing resulting in overall lift in business operations and higher return on investment. Our reliable products powered with always available customer support makes BitRaser the best choice for businesses dealing in mobile and computing reprocessing industry", said Sunil Chandna, CEO of Stellar.

The new releases of BitRaser that have been upgraded after 15 months of hard work by the development team.
