

GEEP USA and GEEP Costa Rica are acquired by Regency Technologies

December 9, 2019 – Toronto, ON: The operations of GEEP USA and GEEP Costa Rica have been sold to Regency Technologies, part of the Reserve Management Group to enhance Regency's leading position as in the electronics recycling and ITAD sectors.

"I am excited to bring these operations together under the Regency brand to expand our footprint and service offerings for all of our stakeholders." said Jim Levine, co-founder and President of Regency Technologies.

GEEP USA and GEEP Costa Rica will officially be integrated with Regency Technologies over the next month. Initially, no material changes in day-to-day operations will be experienced and as Regency begins to optimize operations, service offerings will expand for all our customers.

Regency Technologies boasts unmatched reach across the USA and Central America with ten facilities in and over 1,000 employees dedicated to providing world class solutions to all of our customers and stakeholders.

Regency Technologies unique position as part of the Reserve Management Group gives it unmatched depth by providing a full suite of services to assist customers with all of their recycling needs.
