

XRF NEXT GENERATION PRESS RELEASE REDWAVE Solutions US LLC

ALPHARETTA, GA, USA - June 1, 2022 - REDWAVE, the leader in XRF non-ferrous metal sorting technology, announces a breakthrough machine that has an average ROI of 1-2 years. Exclusive upgrades, minimal downtime, adaptable footprint, and adjustable sorting widths make REDWAVE's XRF sorter the most versatile in the industry.

The ***One Machine is All You Need*** motto materializes in the unique features available in the next generation machine:

- Sortable material sizes from (5) 10-180 mm
- Compact and versatile footprint
- Free-Fall design eliminates moving parts and downtime
- Throughputs of up to 14 t/hr (ZORBA)
- Expandible chassis for different sorting widths

The success of the unit is based on a combination of XRF and camera recognition software that supports rapid alloy and shape recognition. The new software enhancements allow for a final furnace ready product while granting clients the flexibility for continuous product development and quick reaction in keeping with changing market trends. As one of our Team stated, "If we did any more, we'd be defying the laws of physics. "

With 25 years in the industry, and over 1000 sorting machines operating worldwide, REDWAVE's ability to provide sole-source solutions throughout the recycling and mining industry has built a strong reputation. Our sorting equipment and plant building expertise has created an opportunity for clients to have input in what is needed in their exact industry. They asked for it...we delivered.
