

IntegriCo Composites announces its formal alliance with Astro Industries based in West Monroe, LA.

January 17, 2014-- IntegriCo Composites announces its formal alliance with Astro Industries based in West Monroe, LA. Astro (formerly Bayou Plastics) was formed in 1998 as a recycler and processor of post-consumer and post-industrial plastics.

Astro President and IntegriCo board member Jim Green commented, “This strategic partnership will fundamentally strengthen both companies through vertical integration for raw materials.”

IntegriCo Composites, Inc. is a fast growing Texas based manufacturer of composite railroad products made from recycled plastics. IntegriCo’s unique processing technology utilizes landfill-bound plastic to create railroad products that outperform others by virtually every measure including the most important —long life in track. The Company's website is found at <http://www.IntegriCo.com>.

Astro Industries started as a small plastics recycling company in Northeast Louisiana and has been in business for over 16 years. The Company has since expanded its service offerings to include plastic compounding for domestic and foreign markets. The Company’s mission is to find new ways to reduce waste while saving customers money and forging long-lasting relationships. Astro provides quality repro, regrind and densified materials at competitive price points. The Company's website is found at <http://www.astroindustriesus.com/>.
