UNITED STATES DISTRICT COURT  
NORTHERN DISTRICT OF CALIFORNIA

KATHLEEN SMITH,  
Plaintiff,

v.

KEURIG GREEN MOUNTAIN, INC.,  
Defendant.

Case No. [18-cv-06690-HSG](#)

**ORDER GRANTING PLAINTIFF'S  
MOTION FOR CLASS  
CERTIFICATION**

REDACTED VERSION

Re: Dkt. No. 64, 65, 74, 79

Pending before the Court are Plaintiff’s motion for class certification and related administrative motions to seal. For the reasons detailed below, the Court **GRANTS** Plaintiff’s motion to certify and **GRANTS** the parties’ related motions to seal.

**I. BACKGROUND**

On September 28, 2018, Plaintiff Kathleen Smith filed this putative class action against Keurig Green Mountain, Inc. (“Keurig”) in Alameda County Superior Court. *See* Dkt. No. 1-2, Ex. B. Keurig removed the action to federal court. Dkt. No. 1. Keurig sells various single-serve plastic coffee pods (“K-Cups” or “Pods”), some of which Keurig markets and sells as “recyclable” (the “Products”). Dkt. No. 20 ¶¶ 1–2. Plaintiff is a California resident who purchased the Products “in reliance on [Keurig]’s false representations that the [Pods] are recyclable,” when Plaintiff alleges that they are not in fact recyclable because (a) less than 60% (or a “substantial majority”) of facilities will accept the Products, (b) the Products’ size prevents them from being properly sorted by recycling programs, and (c) there is a lack of end markets to recycle the Products. *Id.* ¶¶ 2, 37–38. Plaintiff alleges the following claims: (1) breach of express warranty, (2) violation of the California Consumers Legal Remedies Act, Cal. Civ. Code §§ 1750 *et seq.* (“CLRA”), (3) violation of California’s Unfair Competition Law, Cal. Bus. & Prof. Code §§ 17200 *et seq.* (“UCL”) based on fraudulent acts and practices (4) violation of the UCL based on

United States District Court  
Northern District of California

1 commission of unlawful acts, (5) violation of the UCL based on unfair acts and practices, and (6)  
2 unjust enrichment. *See id.* ¶¶ 50–99.

3 The Court denied Keurig’s motion to dismiss on June 28, 2019. *See* Dkt. No. 50. As  
4 detailed in its Order, the Court held that Plaintiff had standing to and sufficiently alleged injury-in-  
5 fact, causation, and redressability. *Id.* at 4–6. The Court further rejected Keurig’s argument that  
6 there was no risk of future deception of Plaintiff, distinguishing *Davidson v. Kimberly-Clark*  
7 *Corp.*, 889 F.3d 956, 969 (9th Cir. 2018).

8 Plaintiff now moves for class certification. *See* Dkt. No. 64-5 (“Mot.”), 74-2 (“Opp.”), 79-  
9 5 (“Reply”).

## 10 **II. LEGAL STANDARD**

11 Federal Rule of Civil Procedure (“Rule”) 23 governs class actions, including the issue of  
12 class certification. Class certification is a two-step process. To warrant class certification, a  
13 plaintiff “bears the burden of demonstrating that she has met each of the four requirements of Rule  
14 23(a) and at least one of the requirements of Rule 23(b).” *Zinser v. Accufix Research Inst., Inc.*,  
15 253 F.3d 1180, 1186 (9th Cir.), *opinion amended on denial of reh’g*, 273 F.3d 1266 (9th Cir.  
16 2001); *see also Wal-Mart Stores, Inc. v. Dukes*, 564 U.S. 338, 351 (2011) (“A party seeking class  
17 certification must affirmatively demonstrate [her] compliance with the Rule.”).

18 Rule 23(a) provides that a district court may certify a class only if: “(1) the class is so  
19 numerous that joinder of all members is impracticable; (2) there are questions of law or fact  
20 common to the class; (3) the claims or defenses of the representative parties are typical of the  
21 claims or defenses of the class; and (4) the representative parties will fairly and adequately protect  
22 the interests of the class.” Fed. R. Civ. P. 23(a). That is, the class must satisfy the requirements of  
23 numerosity, commonality, typicality, and adequacy of representation to maintain a class action.  
24 *Mazza v. Am. Honda Motor Co., Inc.*, 666 F.3d 581, 588 (9th Cir. 2012).

25 If the four prerequisites of Rule 23(a) are met, a court also must find that the plaintiff  
26 “satisf[ies] through evidentiary proof” one of the three subsections of Rule 23(b). *Comcast Corp.*  
27 *v. Behrend*, 569 U.S. 27, 33 (2013). Plaintiffs assert that they meet the requirements of both Rule  
28 23(b)(2) and 23(b)(3). *See* Mot. at 17–23, 24. Rule 23(b)(2) provides for certification where “the

1 party opposing the class has acted or refused to act on grounds that apply generally to the class, so  
 2 that final injunctive relief or corresponding declaratory relief is appropriate respecting the class as  
 3 a whole.” Fed. R. Civ. P. 23(b)(2). Rule 23(b)(3), in turn, applies where there is both  
 4 “predominance” and “superiority,” meaning “questions of law or fact common to class members  
 5 predominate over any questions affecting only individual members, and . . . a class action is  
 6 superior to other available methods for fairly and efficiently adjudicating the controversy.” *See*  
 7 Fed. R. Civ. P. 23(b)(3).

8 The Court’s “class-certification analysis must be ‘rigorous’ and may ‘entail some overlap  
 9 with the merits of the plaintiff’s underlying claim.’” *Amgen Inc. v. Connecticut Ret. Plans &*  
 10 *Trust Funds*, 568 U.S. 455, 465–66 (2013) (citing *Dukes*, 564 U.S. 350–51). However, “Rule 23  
 11 grants courts no license to engage in free-ranging merits inquiries at the certification stage,” and  
 12 “[m]erits questions may be considered to the extent—but only to the extent—that they are relevant  
 13 to determining whether the Rule 23 prerequisites for class certification are satisfied.” *Id.* at 1194–  
 14 95; *see also Ellis v. Costco Wholesale Corp.*, 657 F.3d 970, 981 (9th Cir. 2011) (“[A] district court  
 15 *must* consider the merits if they overlap with the Rule 23(a) requirements.”). The issue to be  
 16 decided in a certification motion is whether the case should be “conducted by and on behalf of the  
 17 individual named parties only” or as a class. *See Dukes*, 564 U.S. at 348.

### 18 **III. ANALYSIS**

19 Plaintiff moves to certify a class of “All persons who purchased the Products for personal,  
 20 family or household purposes in California (either directly or through an agent) from June 8, 2016  
 21 through the present.” Mot. at 11. Plaintiff seeks certification of all six claims for relief. *Id.* at 10.  
 22 In response, Defendant asserts that (1) Plaintiff fails to meet the requirements of Rule 23(a), (2)  
 23 Plaintiff fails to meet the requirements of Rule 23(b)(3), and (3) Plaintiff fails to meet the  
 24 requirements of Rule 23(b)(2) because Plaintiff lacks standing and the proposed relief is not  
 25 indivisible, and (4) the class definition is overbroad. *See Opp.* The Court addresses each  
 26 argument in turn.

#### 27 **A. Rule 23(a)**

28 As noted above, under Rule 23(a) the class must satisfy the requirements of numerosity,

1 commonality, typicality, and adequacy of representation. *Mazza*, 666 F.3d at 588. Keurig argues  
2 that Plaintiff cannot satisfy the typicality and adequacy requirements.<sup>1</sup>

3 **i. Typicality**

4 Rule 23(a)(3) requires that “the claims or defenses of the representative parties are typical  
5 of the claims or defenses of the class.” Fed R. Civ. P. 23(a)(3). “The test of typicality is whether  
6 other members have the same or similar injury, whether the action is based on conduct which is  
7 not unique to the named plaintiffs, and whether other class members have been injured by the  
8 same course of conduct.” *Hanon v. Dataproducts Corp.*, 976 F.2d 497, 508 (9th Cir. 1992)  
9 (quotation omitted). Under the “permissive standards” of Rule 23(a)(3), the claims need only be  
10 “reasonably co-extensive with those of absent class members,” rather than “substantially  
11 identical.” *Hanlon v. Chrysler Corp.*, 150 F.3d 1011, 1020 (9th Cir. 1998). In other words,  
12 typicality is “satisfied when each class member’s claim arises from the same course of events, and  
13 each class member makes similar legal arguments to prove the defendant’s liability.” *Rodriguez v.*  
14 *Hayes*, 591 F.3d 1105, 1124 (9th Cir. 2010) (quotation omitted).

15 Keurig contends that Plaintiff fails to show that her claims are typical of the claims of the  
16 class because “there are defenses unique to” her individual claims. Mot. at 8. Specifically, Keurig  
17 argues that Plaintiff had not “read the recycling label on the boxes of [the Products] that she  
18 purchased online,” had never “seen the revised labels on Laughing Man boxes or the revised labels  
19 on all [P]roducts produced after 2017,” could not “say whether the recycling agency in her  
20 community recycles [Pods],” and cannot “claim to have been deceived in any way by Keurig,  
21 because she concede[d] that she [did not] even know how she learned about recyclable K-Cup  
22 pods.” *Id.* at 9 (citing Dkt. No. 74-18 (“Smith Depo.”) at 62–64). But these details do not  
23 establish that Plaintiff is susceptible to unique defenses.

24 Contrary to Keurig’s characterization of Plaintiff’s deposition testimony, Plaintiff did not  
25 testify that she did not read the recyclability labels. She testified instead that she did not see the  
26 “Check Locally” asterisk on the “Peel, Empty, Recycle” label until after the suit was filed. *See*

27 \_\_\_\_\_  
28 <sup>1</sup> Keurig does not contest that Plaintiff satisfies the numerosity and commonality requirements.  
*See* Mot. at 8 n.8.

1 Dkt. No. 79-6, Ex. 6 at 58:17–19, 66:8-10 (clarifying that Plaintiff did not see the “check locally”  
2 label). She also testified that she was aware of Keurig’s representations that the Products were  
3 recyclable, including the “Peel, Empty, Recycle” representation. *See* Dkt. No. 64-6, Ex. 4 at 2  
4 (noting awareness of the “Recycle,” “Peel, Empty, Recycle,” and “Have your cup and recycle it,  
5 too” labels).<sup>2</sup> What matters is that Plaintiff was aware of Keurig’s representations that the  
6 Products were recyclable and “purchased the Products numerous times over the past couple of  
7 years directly from the Defendant’s website believing that the recycling claims on the Product’s  
8 packaging and on the Defendant’s website were true.” Dkt. No. 64-6, Ex. 4 at 2. The fact that  
9 Plaintiff did not notice the qualification to Keurig’s recyclability representation does not show that  
10 her claims are not typical.

11 Additionally, Plaintiff’s unawareness of whether her local recycling agency accepts the  
12 Pods does not make her claim atypical. Plaintiff’s theory is that even if the Products made from  
13 Polypropylene (#5) plastic are collected in over 60% of U.S. communities, the Products are still  
14 not recyclable due to their size, which prevents accurate sorting or separation, and the lack of end  
15 markets to recycle them. Mot. at 2 (citing 16 C.F.R. § 260.12(a) (“It is deceptive to misrepresent,  
16 directly or by implication, that a product or package is recyclable. A product or package should  
17 not be marketed as recyclable unless it can be collected, separated, or otherwise recovered from  
18 the waste stream through an established recycling program for reuse or use in manufacturing or  
19 assembling another item.”)). Whether Plaintiff’s particular community recycling facilities accept  
20 the Products does not affect her typicality, given the claims’ focus on recyclability requirements  
21 beyond just collection. For the same reason, that Plaintiff did not see the labels with updated  
22 qualifications after 2017 does not make her atypical. Keurig still represented that the Pods were  
23 recyclable even after it redesigned the label to include a qualification that the Products were “not  
24

---

25 <sup>2</sup> Thus, Keurig’s cited cases in which the plaintiff did not view any of the allegedly deceptive  
26 labels or advertisements are inapposite. *See Aberdeen v. Toyota Motor Sales, U.S.A.*, No. CV-08-  
27 1690-PSG, 2009 WL 7715964, at \*6 (C.D. Cal. June 23, 2009), *rev’d in part on other grounds*,  
28 422 F. App’x 617 (9th Cir. 2011) (finding plaintiff not typical of the class “[b]ecause Plaintiff did  
not view any of Toyota’s allegedly deceptive advertisements prior to purchasing his Prius”);  
*Circle Click Media LLC v. Regus Mgmt. Grp. LLC*, No. 3:12-CV-04000-SC, 2015 WL 6638929,  
at \*11 (N.D. Cal. Oct. 30, 2015) (similarly noting that named plaintiff who did not read the terms  
and conditions at issue did not satisfy the typicality requirement).

1 recycled in all communities.” Dkt. No. 74-14 (“Oxender Decl.”) at ¶¶ 24–25. Plaintiff’s theory  
 2 that the other requirements were not met would still render the representation deceptive, even for  
 3 the redesigned labels.<sup>3</sup>

4 Finally, Keurig fails to detail how Plaintiff’s inability to remember how she learned of the  
 5 Products’ alleged recyclability exposes her to any unique defenses, and the Court sees no reason  
 6 why this would be the case. In light of her testimony that she relied on Keurig’s representations  
 7 on the Products’ packaging and website, the Court finds that Plaintiff meets the typicality  
 8 requirement.

9 **ii. Adequacy**

10 Rule 23(a)(4) requires that the “representative parties will fairly and adequately represent  
 11 the interests of the class.” In assessing adequacy, the Court must address two legal questions: (1)  
 12 whether the named plaintiffs and their counsel have any conflicts of interest with other putative  
 13 class members, and (2) whether the named plaintiffs and their counsel will prosecute the action  
 14 vigorously on behalf of the proposed class. *See In re Mego Fin. Corp. Sec. Litig.*, 213 F.3d 454,  
 15 462 (9th Cir. 2000). This inquiry “tend[s] to merge” with the commonality and typicality criteria.  
 16 *Gen. Tel. Co. of Sw. v. Falcon*, 457 U.S. 147, 158 n.13 (1982).

17 Keurig similarly contends that Plaintiff fails to meet the adequacy requirement because  
 18 Plaintiff “never read” the labels and “never checked locally to see if she could recycle” the Pods.  
 19 Opp. at 10. For the same reasons noted above, Keurig’s arguments fail. Plaintiff may not have  
 20 read the specific qualifications to the recyclability representation or checked whether her local  
 21 recycling center accepted the Products, but the class claims concern whether the Pods Keurig  
 22 claims are recyclable actually can be recycled under the Federal Trade Commission’s (“FTC”)  
 23 guidance. As the Court stated in a previous order, the FTC’s Guides for the Use of Environmental  
 24 Marketing Claims (“Green Guides”) state that “if a product is rendered non-recyclable because of

25 \_\_\_\_\_  
 26 <sup>3</sup> Unlike *Wiener v. Dannon Co.*, 255 F.R.D. 658, 666 (C.D. Cal. 2009), cited by Keurig, this case  
 27 does not involve “a variety of products,” and thus does not raise the prospect that “a named  
 28 plaintiff that purchased a different product than that purchased by unnamed plaintiffs” does not  
 meet the typicality requirement. The redesigned label did not create a separate product, and as  
 explained above, Plaintiff’s misrepresentation theory encompasses the later labels, as it is the  
 fundamental ability to recycle the Products that is at issue in this case.

1 its size or components—even if the product’s composite materials are recyclable—then labeling  
2 the product as recyclable would constitute deceptive marketing.” Dkt. No. 50 at 8 (citing 16  
3 C.F.R. § 260.12(d)). The Green Guides also provide that a marketer may make an unqualified  
4 recyclability claim only “[w]hen recycling facilities are available to a substantial majority of  
5 consumers or communities where the item is sold.” 16 C.F.R. § 260.12(b)(1). Defendant’s  
6 arguments do not affect Plaintiff’s adequacy to represent the proposed class.

7 **B. Rule 23(b)(3)**

8 Rule 23(b)(3) requires that “the questions of law or fact common to class members  
9 predominate over any questions affecting only individual members, and that a class action is  
10 superior to other available methods for fairly and efficiently adjudicating the controversy.” Keurig  
11 contends that Plaintiff fails to meet both the predominance and superiority requirements. Opp. at  
12 11–21.

13 **i. Predominance**

14 “The predominance inquiry tests whether proposed classes are sufficiently cohesive to  
15 warrant adjudication by representation.” *Tyson Foods, Inc. v. Bouaphakeo*, 136 S. Ct. 1036, 1045  
16 (2016) (internal quotation marks omitted). The Supreme Court has defined an individual question  
17 as “one where members of a proposed class will need to present evidence that varies from member  
18 to member, while a common question is one where the same evidence will suffice for each  
19 member to make a prima facie showing [or] the issue is susceptible to generalized, class-wide  
20 proof.” *Id.* (citation and internal quotation marks omitted) (alterations in original). This “inquiry  
21 asks whether the common, aggregation-enabling, issues in the case are more prevalent or  
22 important than the non-common, aggregation-defeating, individual issues.” *Id.* (citation and  
23 internal quotation marks omitted). The Supreme Court has made clear that Rule 23(b)(3)’s  
24 predominance requirement is “even more demanding” than the commonality requirement of Rule  
25 23(a). *See Comcast*, 569 U.S. at 34 (citing *Amchem Prods., Inc. v. Windsor*, 521 U.S. 591, 623-24  
26 (1997)).

27 **a. Reliance**

28 Keurig first argues that there is a lack of classwide reliance on the recyclability statements,

1 precluding a finding of predominance in this case. Opp. at 11–13. Keurig’s Chief Sustainability  
 2 Officer, Monique Oxender, points to commissioned and internal consumer surveys finding that

3 [REDACTED]  
 4 [REDACTED] and that recyclability [REDACTED]

5 [REDACTED] See Oxender Decl. at ¶¶ 27–28. Ms. Oxender further says that [REDACTED]  
 6 [REDACTED]

7 [REDACTED] *Id.* at ¶ 29. Given these findings, Keurig argues that “the overwhelming majority of  
 8 members of the proposed class did not read the labeling on [Pod’s] boxes and that only a small  
 9 minority could plausibly claim to have based their purchase decisions on recyclability.” Opp. at  
 10 11. Additionally, Keurig argues that “absent individualized inquiry, there is no practical way of  
 11 determining whether a purchase was a putative class member’s purchase made in reliance on a  
 12 recyclability representation.” *Id.*

13 Plaintiff responds first by noting that the majority of her claims do not require a showing  
 14 of reliance by the proposed class members on recyclability representations. See Reply at 6  
 15 (arguing that reliance is only an element for Plaintiff’s CLRA claim). The Court agrees that  
 16 Plaintiff’s breach of warranty claim does not require proof of reliance. See *In re Nexus 6P Prod.*  
 17 *Liab. Litig.*, 293 F. Supp. 3d 888, 915 (N.D. Cal. 2018) (“Because California’s express warranty  
 18 statute conforms to the UCC, the California Court of Appeal has held that a buyer need not show  
 19 reliance because the California statute “creates a presumption that the seller’s affirmations go to  
 20 the basis of the bargain.”) (quoting *Weinstat v. Dentsply Int’l, Inc.*, 103 Cal. Rptr. 3d 614, 626  
 21 (Cal. Ct. App. 2010)).

22 The Court also agrees that proof of reliance by the proposed class is not required to  
 23 establish a UCL claim. Instead, a plaintiff must prove that he or she suffered injury “as a result  
 24 of” the defendant’s conduct. Cal. Bus. & Prof. Code § 17204. “The California Supreme Court  
 25 interpreted this statute to mean that named plaintiffs, but not absent ones, must show proof of  
 26 ‘actual reliance’ at the certification stage.” *Walker v. Life Ins. Co. of the Sw.*, 953 F.3d 624, 630  
 27 (9th Cir. 2020) (quoting *In re Tobacco II Cases*, 328, 207 P.3d 20, 40 (Cal. 2009)). This  
 28 presumption of reliance by the absent class members “will not arise in every UCL case.” *Id.* at

1 631. Instead, “[i]n the absence of [some] kind of massive advertising campaign . . . the relevant  
2 class must be defined in such a way as to include only members who were exposed to advertising  
3 that is alleged to be materially misleading.” *Mazza*, 666 F.3d at 581. Here, Keurig included  
4 representations that the Products were recyclable on the packaging itself, as well as on its website.  
5 *See Oxender Decl.* at ¶¶ 17–26 (showing the recycling language included on Pods’ packaging and  
6 noting “the content on Keurig’s website”). Based on this evidence, the Court finds that all the  
7 class members were exposed to Keurig’s recyclability representations such that the reliance  
8 presumption applies to the class as defined (i.e., purchasers of the Products in California). When  
9 the Products were first available, they were only offered for sale on Keurig’s website. *Id.* at ¶ 16  
10 (“None of these packages w[ere] available for retail purchase except through keurig.com.”).  
11 Thereafter, the recycling representations were also always included on the Products’ packaging.  
12 Since Plaintiff has provided evidence that she relied on those recyclability representations and the  
13 reliance presumption applies, individualized inquiries regarding absent class members’ reliance on  
14 the representations do not preclude a finding of predominance for the UCL claims.

15 Under California law, “[w]hen a plaintiff alleges unjust enrichment, a court may construe  
16 the cause of action as a quasi-contract claim seeking restitution.” *Astiana v. Hain Celestial Grp.,*  
17 *Inc.*, 783 F.3d 753, 762 (9th Cir. 2015). To establish a quasi-contract claim, “[t]he fact that one  
18 person benefits another is not, by itself, sufficient to require restitution. The person receiving the  
19 benefit is required to make restitution only if the circumstances are such that, as between the two  
20 individuals, it is unjust for the person to retain it.” *Doe I v. Wal-Mart Stores, Inc.*, 572 F.3d 677,  
21 684 (9th Cir. 2009). Here, Plaintiff claims that Keurig unjustly retained the revenues derived from  
22 class members’ purchase of the Products, even though they falsely represented that the Products  
23 were recyclable. *See Dkt. No. 20* at ¶¶ 95–97. Plaintiff’s unjust enrichment claim, then, is  
24 derivative of her UCL claims. Inquiries regarding unjustness are typically individualized. *See 1*  
25 *McLaughlin on Class Actions* § 5:60 (11th ed.) (“The majority view is that unjust enrichment  
26 claims usually are not amenable to class treatment because the claim requires evaluation of the  
27 individual circumstances of each claimant to determine whether a benefit was conferred on  
28 defendant and whether the circumstances surrounding each transaction would make it inequitable

1 for the Defendant to fail to return the benefit to each claimant”). But the Court finds the inquiry  
2 presented here—whether Keurig was unjustly enriched by the proposed class members’ purchase  
3 of the Products given its allegedly false representations regarding recyclability—raises the same  
4 legal issues as to all class members. Accordingly, predominance is also met for the unjust  
5 enrichment claim.

6 Finally, the parties agree that the CLRA requires Plaintiff to establish classwide reliance  
7 on the alleged misrepresentations. Keurig relies on *Stearns v. Ticketmaster Corp.*, 655 F.3d 1013,  
8 1024 (9th Cir. 2011), to argue that there “are myriad reasons that someone who was not misled . . .  
9 might [still] have chosen” to purchase the Products. Given Plaintiff’s broad class definition,  
10 Keurig argues that consumers may have purchased the Products for reasons other than the  
11 recyclability representations, precluding a finding of predominance.

12 Plaintiff responds that she may rely on an inference of reliance under the CLRA because  
13 recyclability is material to reasonable consumers. *See* Reply at 8. Generally, the Ninth Circuit has  
14 held that “[i]f the trial court finds that material misrepresentations have been made to the entire  
15 class, an inference of reliance arises as to the class.” *Stearns*, 655 F.3d at 1022 (quoting *In re*  
16 *Vioxx Class Cases*, 103 Cal. Rptr. 3d 83, 95 (Cal. Ct. App. 2009)). The question becomes whether  
17 “a reasonable man would attach importance to [Keurig’s recyclability representations] in  
18 determining his choice of action in the transaction in question.” *Id.* (quoting *Steroid Hormone*  
19 *Prod. Cases*, 104 Cal. Rptr. 3d 329, 338 (Cal. Ct. App. 2010), *as modified on denial of reh’g* (Feb.  
20 8, 2010)). “If the misrepresentation or omission is not material as to all class members, the issue  
21 of reliance ‘would vary from consumer to consumer’ and the class should not be certified.” *Id.*  
22 (quoting *Vioxx*, 103 Cal. Rptr. 3d at 95).

23 As Plaintiff notes, “materiality is generally a question of fact,” and is not evaluated on an  
24 individualized basis, but instead is assessed under a reasonable consumer standard. *See In re*  
25 *Tobacco II Cases*, 46 Cal. 4th at 327; *see also Kwikset Corp. v. Superior Court*, 246 P.3d 877, 892  
26 (Cal. 2011). Plaintiff also points to the California Legislature’s passage of the California  
27 Environmental Marketing Claims Act (“EMCA”) as support for her materiality claim. The  
28 EMCA makes it “unlawful for any person to make any untruthful, deceptive, or misleading

1 environmental marketing claim, whether explicit or implied,” and the term “environmental  
 2 marketing claim . . . include[s] any claim contained in the [Green Guides] published by the  
 3 [FTC].” Cal. Bus. & Prof. Code § 17580.5(a). The California Supreme Court has recognized that  
 4 statutory recognition of materiality is highly persuasive. *See Kwikset*, 246 P.3d at 890 (observing  
 5 that the California Legislature’s “specific[] outlawing” of the alleged deceptive representation  
 6 “recognized the materiality of this representation”). While the EMCA does not specifically  
 7 reference recyclability, the Green Guides, as noted above, impose specific criteria for a product to  
 8 be marketed as recyclable. Accordingly, the Court finds that the inference of reliance is  
 9 appropriate in this case.

10 Keurig’s citation at the hearing to *Ortega v. Nat. Balance, Inc.*, 300 F.R.D. 422, 429 (C.D.  
 11 Cal. 2014), does not change this outcome. *Ortega* did not involve any legislative recognition of  
 12 materiality. Instead, the *Ortega* court found that “the statements alleged to be misrepresentations  
 13 are not ‘so obviously unimportant’ that the Court should decide that question” at the class  
 14 certification stage. 300 F.R.D. at 429. Similarly here, even if the Court were to dig deeper into  
 15 the consumer surveys as Keurig urges, Plaintiff’s claims are “sufficient such that materiality can  
 16 and should be determined by a jury.” *Id.* Accordingly, issues of reliance do not weigh against a  
 17 finding of predominance for any claims.<sup>4</sup>

18 b. Change in Labels / Community Recycling Centers

19 Keurig also points to the change in the Products’ labels over time to argue that the  
 20 qualifications to its recyclability claims were not consistent over time and may have resulted in  
 21

---

22  
 23 <sup>4</sup> For the same reasons, the Court finds unpersuasive Keurig’s argument that the class definition is  
 24 overbroad. Keurig contends that the class definition is overbroad because it “necessarily includes  
 25 persons who bought [Pods] in circumstances where they (1) did not see or review any of the four  
 26 different packaging statements that plaintiff claims are misleading, (2) did see them, but the [Pods]  
 27 are in fact capable of being recycled in their community, or (3) like most, made their purchasing  
 28 decisions for reasons having nothing whatsoever to do with the recyclability of the [Pods].” *Opp.*  
 at 24. Keurig’s claims as to the first and third circumstances simply reiterate its argument  
 regarding reliance, which the Court already analyzed and found unpersuasive. The Court further  
 rejects Defendant’s second argument because Plaintiff’s theory of the case is that the Products are  
 not recyclable in the substantial majority of communities. So differences in whether the Products  
 are recyclable in specific location do not render Keurig’s class definition overbroad. ]

1 different representations to different class members. Opp. at 14–16. Specifically, Keurig  
2 describes three categories of labels: (1) labels on the initial four pilot project blends qualified the  
3 recyclability representation by directing consumers to “Check Locally” prior to 2019; (2) labels on  
4 Laughing Man boxes sold between December 2017 and Summer 2019 included the qualification  
5 “Check Locally” and noted that the Products were “not yet recycled in all communities”; and (3)  
6 all Products sold beginning in Summer 2019 again directed consumers to “Check Locally,” and  
7 noted that the Products were “not recycled in all communities.” *Id.* at 14.

8 The Court does not find that the label changes preclude a finding of predominance.  
9 “Check Locally” was included on all three labels and thus does not defeat predominance. The  
10 qualifier that the Products were “not yet recycled in all communities” was in very fine print on two  
11 of the three labels. *See* Dkt. No. 64-6 (“Hirsh Decl.”), Ex. 8. Importantly, Plaintiff argues that  
12 both qualifiers were insufficient to adequately inform a reasonable consumer such that Keurig’s  
13 recyclable claim was still misleading. Reply at 10. While a recyclable claim may be permitted if  
14 recycling facilities are available to less than a substantial majority, the claim must include the  
15 percentage of communities that have access to such facilities, and where “[t]he lower the level of  
16 access to an appropriate facility is, the more strongly the marketing should emphasize the limited  
17 availability of recycling for the product.” 16 C.F.R. § 260.12(b)(2). Qualifiers such as  
18 “Recyclable where facilities exist” or “Check to see if recycling facilities exist in your area” are  
19 still deceptive under Plaintiff’s theory “because they do not adequately disclose the limited  
20 availability of recycling program.” *Id.* at § 260.12(d). All of Keurig’s qualifiers are subject to  
21 these same standards, and whether they are sufficient (or insufficient) can be established through  
22 common proof.

23 Importantly, Keurig’s representation that the Products were recyclable was in  
24 comparatively large, visible font on all of its packaging. *See* Hirsh Decl., Exs. 6–8. It is this  
25 representation of recyclability that presents the predominant question at issue in this case: whether  
26 Keurig’s representation that the Products are recyclable was misleading to consumers. The slight  
27 variations in the label may add another question regarding the sufficiency of the qualification, but  
28 they do not change the basic question.

1 Similarly, the Court rejects Keurig’s argument that the varying capabilities of materials  
2 recovery facilities at recycling centers would present individual inquiries such that common issues  
3 would not predominate. As explained above, Plaintiff’s class claims allege a general theory that  
4 the Products are not recyclable in a substantial majority of communities such that the  
5 representation is misleading. Whether an individual class member’s recycling facility happened to  
6 accept the Products is irrelevant. This common question can be addressed through classwide  
7 proof, and individualized inquiries into the collection capabilities at each class member’s  
8 community recycling centers do not override the common issues.

9 c. Damages

10 With respect to the monetary relief sought by a putative class, predominance requires that  
11 “damages are capable of measurement on a classwide basis, in the sense that the whole class  
12 suffered damages traceable to the same injurious course of conduct underlying the plaintiffs’ legal  
13 theory.” *Just Film, Inc. v. Buono*, 847 F.3d 1108, 1120 (9th Cir. 2017) (quoting *Comcast Corp. v.*  
14 *Behrend*, 569 U.S. 27, 34 (2013)). While a proffered model purporting to serve as evidence of  
15 damages “need not be exact” at the class certification stage, it “must be consistent with [the  
16 plaintiff’s] liability case.” *Comcast*, 569 U.S. at 35 (citations and internal quotation marks  
17 omitted). Keurig argues that individualized inquiries concerning damages preclude finding that  
18 class issues predominate in this case. Opp. at 17–20.

19 Plaintiff relies on her damages expert, Stephen F. Hamilton, Ph.D, to support her position  
20 that there are “accepted and feasible methodologies for calculating the forms of monetary relief  
21 alleged in this case, using available data from [Keurig] and third parties.” Dkt. No. 64-6, Ex. 3  
22 (“Hamilton Decl.”) at ¶ 17. The Court begins by noting that Plaintiff does little in her brief to  
23 develop the damages analysis of her expert and instead simply cites large swaths of his  
24 declaration. See Mot. at 21–22 (citing Hamilton Decl. at ¶¶ 44–53, 54–98). As described by Dr.  
25 Hamilton, Plaintiff offers varying methods for calculating restitution and monetary damages in  
26 this case.

27 First, recognizing that the Products had some value to consumers despite the alleged  
28 misrepresentations, Dr. Hamilton presents three primary methods for calculating restitution or

1 unjust gains: net sales, gross margin, and operating income. *Id.* at ¶¶ 47–49, 53. Dr. Hamilton’s  
 2 proposed net sales model represents the revenues obtained by Keurig from the sale of the Products  
 3 (“after deducting adjustments such as returns, rebates, or discounts”) and “is consistent with the  
 4 notion that [Keurig] should not be able to retain any sales revenue received through selling falsely  
 5 labeled [Keurig] products.” *Id.* at ¶ 45. The proposed gross margin model is calculated by  
 6 subtracting the cost of goods sold from the revenues. *Id.* Finally, the operating income model  
 7 “represents the profits retained by [Keurig], after deducting operating expenses,” and “is  
 8 consistent with the notion that members of the proposed Class received a product with a value  
 9 equal to the average overall cost of producing the product.” *Id.*

10 The problem with all of the proposed models is that they look to Keurig’s gains, rather  
 11 than the proposed class members’ losses. Although Dr. Hamilton carefully does not refer to “all  
 12 profit” or “purchase price” when discussing the models,<sup>5</sup> the “net sales” model would award a  
 13 higher value than all profits gained by Keurig since costs are not subtracted. The “gross margin”  
 14 model calculates a value equal to all profits (generally calculated by subtracting the cost of goods  
 15 sold from their price). The “operating income” model essentially starts with Keurig’s profits then  
 16 subtracts some additional expenses. “The proper measure of restitution in a mislabeling case is the  
 17 amount necessary to compensate the purchaser for the difference between a product as labeled and  
 18 the product as received, not the full purchase price or all profits.” *Trazo v. Nestlé USA, Inc.*, 113  
 19 F. Supp. 3d 1047, 1052 (N.D. Cal. 2015) (internal citation omitted). Plaintiff’s proposed models  
 20 are most accurately described as nonrestitutionary disgorgement, which is an improper method of  
 21 calculating restitution as a matter of law. *See Korea Supply Co. v. Lockheed Martin Corp.*, 63  
 22 P.3d 937, 944 (Cal. 2003) (differentiating restitutionary disgorgement from nonrestitutionary  
 23 disgorgement, which is the “surrender of all profits earned as a result of an unfair business practice  
 24 regardless of whether those profits represent money taken directly from persons who were victims  
 25 of the unfair practice”) (internal citation omitted); *see also Ang v. Bimbo Bakeries USA, Inc.*, No.

26  
 27 \_\_\_\_\_  
 28 <sup>5</sup> However, when referring to the models in his reply, Dr. Hamilton does refer to the “gross profit”  
 model instead of the “gross margin,” and “net profit before tax” model instead of the “operating  
 income” model. *See* Dkt. No. 79-6, Ex. 3 (“Hamilton Reply”) at ¶ 75.

1 13-cv-01196-HSG, 2018 WL 4181896, at \*14 (N.D. Cal. Aug. 31, 2018). Although Plaintiff tries  
2 to distinguish this case because the funds would be given to purchasers instead of a third party,  
3 that distinction is immaterial because the funds do not represent losses suffered by the proposed  
4 class: they simply measure Keurig’s gains, calculated different ways. After recognizing that the  
5 products have value to the proposed class, the proposed models fail to use that value to  
6 appropriately calculate restitution on a classwide basis.

7 Plaintiff’s arguments to the contrary are unpersuasive. Plaintiff quotes *Fletcher v. Sec.*  
8 *Pac. Nat’l Bank*, 23 Cal. 3d 442, 449 (Cal. 1979), to argue that the purpose of UCL restitution is  
9 “to deter future violations of the unfair trade practice statute and to foreclose retention by the  
10 violator of its ill-gotten gains.” Mot. at 21–22. However, as the California courts have since  
11 explained, *Fletcher* concerned a bank’s unfair business practice of overcharging interest, which  
12 “did not confer any benefit on consumers.” *In re Tobacco Cases II*, 192 Cal. Rptr. 3d 881, 897  
13 (Cal. Ct. App. 2015). Because there was no benefit to consumers, the *Fletcher* court permitted a  
14 full refund restitution model, focused solely on ill-gotten gains. *Id.* at 896–97. Here, there plainly  
15 was a benefit conferred on consumers, as Plaintiff concedes. Thus, using calculations focused  
16 solely on Keurig’s profits or costs, untethered from some difference in consumer value between a  
17 Pod that was recyclable and the allegedly unrecyclable Pods received by the proposed class, does  
18 not provide a restitutionary remedy.

19 Plaintiff’s expert also proposes damages methods “to calculate consumer overcharge using  
20 metrics on increased sales for the Challenged Products as a result of the recyclable claims,” given  
21 that Keurig did not charge a higher price for the Products compared to non-recyclable Pods. *Id.* at  
22 ¶ 55. These methods include (1) the attributed cost method, which “measures the difference in the  
23 cost per unit for producing a [Keurig] product in a recyclable cup relative to a conventional cup”;  
24 (2) the price premium method using either (a) the induced demand method, which uses a  
25 regression framework “to measure the market demand response of introducing a recyclable  
26 packaging claim on the product label, allowing tests to be conducted on whether a product sold in  
27 a recyclable container indeed attracts significantly greater sales than a comparable product absent  
28 the recyclable claim,” or (b) the difference-in-difference method, which similarly measures market

1 demand but also allows the “control [of] other changes in product attributes that can potentially  
2 affect price”; and (3) conjoint analysis, which “is focused on directly measuring consumers’  
3 willingness to pay for the product attribute of interest by eliciting the value of products with and  
4 without the recyclable packaging representations” through consumer surveys. *Id.* at ¶¶ 57, 59, 63,  
5 74, 82.

6 Keurig first argues that the attributed cost method is not an adequate damages model  
7 because the cost of producing a recyclable K-Cup is completely unrelated to the value consumers  
8 place on recyclability. *Opp.* at 20. As noted above, the Court agrees that utilizing a cost model  
9 does not bear any relation to any incremental value realized by consumers.

10 Keurig next argues that Plaintiff cannot “measure the ‘value’ of the recyclability attribute  
11 by measuring increased sales, because there is no evidence that it affected sales.” *Opp.* at 19.  
12 Specifically, Keurig contends that because there is no price difference between the Products and  
13 non-recyclable K-Cups, Plaintiff’s damages proposals are entirely conjectural. *Id.* at 19–20.  
14 However, “[t]he fact that the price of the product did not change after the representation does not  
15 establish that there is no triable issue as to whether Plaintiffs paid a price premium.” *Schneider v.*  
16 *Chipotle Mexican Grill, Inc.*, 328 F.R.D. 520, 531 (N.D. Cal. 2018); *see also McCrary v. Elations*  
17 *Co. LLC*, No. 13-cv-0242-JGB (SPX), 2014 WL 12589137, at \*9 (C.D. Cal. Dec. 2, 2014) (“A  
18 price premium may exist even though” the product “was sold at the same price” with and without  
19 the alleged misrepresentation). As Plaintiff’s expert explains through an example:

20 For example, a 24-count package of GMCR Dark Magic coffee pods  
21 was first shipped under the recyclable claim during the week of June  
22 13, 2019. Prior to the week of June 13, 2019, [Keurig] sold this same  
23 product absent the recyclable packaging claims, allowing  
econometric analysis to be conducted to measure the change in value  
resulting from the recyclable claim without the need to control for  
other variables.

24 Hamilton Decl. at ¶ 78. Significantly, there is no indication that the underlying products changed,  
25 except for the recyclability claim. The methodology to calculate a price premium in this manner  
26 thus represents a plausible method to calculate damages consistent with Plaintiff’s liability case.  
27 Such a method appropriately accounts for some consumer value obtained from the Products and  
28 focuses narrowly on determining what price premium, if any, resulted from the recyclability claim.

1           Keurig argues that Plaintiff’s expert has not given any specific calculation and instead  
2 presents a “wait-and-see” approach that has been rejected by the Ninth Circuit. Opp. at 18 (citing  
3 *Ward v. Apple Inc.*, 784 F. App’x 539 (9th Cir. 2019)). The expert declaration in *Ward* proffered  
4 only “theories of impact and damages” using “common methodology and data.” *Ward v. Apple*  
5 *Inc.*, 12-cv-05404-YGR, 2018 WL 934544, at \*3 (N.D. Cal. Feb. 16, 2018). Here, by contrast,  
6 Plaintiff proposes a model that is consistent with the specific nuances of Plaintiff’s theory in this  
7 case, accounting for factors including time for shelf conversion and multiple product attributes  
8 valued by consumers. Additionally, Plaintiff’s expert, like Keurig’s expert, details a hypothetical  
9 scenario showing how the model works (even though the experts predictably disagree on whether  
10 the solution is appropriate on a classwide basis). See David Decl. at ¶¶ 47–50; Hamilton Reply at  
11 ¶¶ 48–49. Finally, Plaintiff’s expert points to specific evidence—daily or weekly retail scanner  
12 sales volume data—needed in order to give a meaningful estimate of damages using the induced  
13 demand regression model. Hamilton Decl. at ¶ 81; Hamilton Reply at ¶¶ 36–40. Unlike *Ward*,  
14 the proposed model is not purely theoretical, but can be applied concretely (as demonstrated by  
15 both experts) once the appropriate data is obtained.

16           Accordingly, the Court finds that Plaintiff presents a plausible damages model, and thus  
17 meets the last requirement to establish predominance.

## 18           **ii. Superiority**

19           The superiority requirement tests whether “a class action is superior to other available  
20 methods for fairly and efficiently adjudicating the controversy.” Fed. R. Civ. P. 23(b)(3). The  
21 Court considers four non-exclusive factors: (1) the interest of each class member in individually  
22 controlling the prosecution or defense of separate actions; (2) the extent and nature of any  
23 litigation concerning the controversy already commenced by or against the class; (3) the  
24 desirability of concentrating the litigation of the claims in the particular forum; and (4) the  
25 difficulties likely to be encountered in the management of a class action. *Id.* “Where classwide  
26 litigation of common issues will reduce litigation costs and promote greater efficiency, a class  
27 action may be superior to other methods of litigation.” *Valentino v. Carter-Wallace, Inc.*, 97 F.3d.  
28 1227, 1235 (9th Cir. 1996).

1 Plaintiff satisfies the superiority requirement. Keurig’s arguments regarding this  
2 requirement largely mirror its predominance arguments. Pointing to the fourth factor, Keurig  
3 argues that individualized inquiries “are central to the question of liability.” Opp. at 20–21. For  
4 the same reasons discussed above, Plaintiff’s theory of the case—that the Products are not  
5 recyclable in a substantial majority of communities where they are sold—allows her to submit  
6 proof on a classwide basis and obviates any manageability concerns.

7 **C. Rule (b)(2)**

8 “Rule 23(b)(2) applies only when a single injunction . . . would provide relief to each  
9 member of the class.” *Dukes*, 564 U.S. at 360. The “key” to finding a class certifiable under Rule  
10 23(b)(2) “is the indivisible nature of the injunctive or declaratory remedy warranted—the notion  
11 that the conduct is such that it can be enjoined . . . only as to all of the class members or as to none  
12 of them.” *Id.* (citation and internal quotation marks omitted) (emphasis added). Rule 23(b)(2)  
13 “does not authorize class certification when each individual class member would be entitled to a  
14 *different* injunction . . . against the defendant,” or “to an individualized award of monetary  
15 damages.” *Id.* at 360–61 (emphasis in original).

16 Keurig argues that Plaintiff lacks standing to seek injunctive relief because Keurig has  
17 added qualifying language that comports with the FTC’s recommendations and Plaintiff is now  
18 fully informed regarding the Products’ recyclability (or unrecyclability) such that she cannot be  
19 injured in the future. Opp. at 22–23. Importantly, Plaintiff’s theory of the case is that the  
20 Products are not recyclable under the FTC’s criteria, and that the qualifying language does not  
21 cure Keurig’s inaccurate and misleading representations of recyclability. The qualifying language  
22 thus does not strip Plaintiff of standing to seek injunctive relief. Similarly, as the Court found in  
23 its order denying Defendant’s motion to dismiss, Keurig’s reliance on *Davidson* is misplaced. 889  
24 F.3d at 969. Because “Keurig could plausibly make recyclable Pods without changing their size:  
25 MRFs could evolve to be able to capture small plastics such as Pods, such that all Keurig would  
26 need to do is make it easier to clean out the Pods and remove their foil lids,” the Court again holds  
27 that Plaintiff has standing to seek injunctive relief. Dkt. No. 50 at 6–7.

28 Next, Keurig argues that the proposed injunctive relief is not indivisible and that Rule

1 23(b)(2) does not apply in this case. Keurig argues, echoing the themes of several of its prior  
2 arguments, that injunctive relief “cannot be granted to those consumers who live in communities  
3 that do not recycle [the Products] (*i.e.*, those who are allegedly harmed) and those who live in  
4 communities that do (*i.e.*, those who cannot be harmed).” Opp. at 23 (emphasis in original).  
5 Again, Keurig fails to take Plaintiff’s theory of this case into account. It is not individual  
6 community recycling facilities’ ability to collect the Products that is at issue. Instead, Plaintiff  
7 alleges that the Products are not recyclable in a substantial majority of communities in which they  
8 are sold such that Keurig’s representation is misleading. The proposed injunctive relief—an order  
9 to enjoin Keurig from advertising their products as recyclable—may be granted and provide relief  
10 for all proposed class members. Plaintiff thus satisfies the requirements of Rule 23(b)(2).

#### 11 **IV. MOTIONS TO FILE UNDER SEAL**

12 Courts generally apply a “compelling reasons” standard when considering motions to seal  
13 documents. *Pintos v. Pac. Creditors Ass’n*, 605 F.3d 665, 678 (9th Cir. 2010) (quoting *Kamakana*  
14 *v. City & Cty. of Honolulu*, 447 F.3d 1172, 1178 (9th Cir. 2006)). “This standard derives from the  
15 common law right ‘to inspect and copy public records and documents, including judicial records  
16 and documents.’” *Id.* (quoting *Kamakana*, 447 F.3d at 1178). “[A] strong presumption in favor of  
17 access is the starting point.” *Kamakana*, 447 F.3d at 1178 (quotations omitted). To overcome this  
18 strong presumption, the party seeking to seal a judicial record attached to a dispositive motion  
19 must “articulate compelling reasons supported by specific factual findings that outweigh the  
20 general history of access and the public policies favoring disclosure, such as the public interest in  
21 understanding the judicial process” and “significant public events.” *Id.* at 1178–79 (quotations  
22 omitted).

23 Records attached to nondispositive motions must meet the lower “good cause” standard of  
24 Rule 26(c) of the Federal Rules of Civil Procedure, as such records “are often unrelated, or only  
25 tangentially related, to the underlying cause of action.” *Id.* at 1179–80 (quotation omitted). This  
26 requires a “particularized showing” that “specific prejudice or harm will result” if the information  
27 is disclosed. *Phillips ex rel. Estates of Byrd v. Gen. Motors Corp.*, 307 F.3d 1206, 1210–11 (9th  
28 Cir. 2002); *see also* Fed. R. Civ. P. 26(c). “Broad allegations of harm, unsubstantiated by specific

United States District Court  
Northern District of California

1 examples of articulated reasoning” will not suffice. *Beckman Indus., Inc. v. Int’l Ins. Co.*, 966  
2 F.2d 470, 476 (9th Cir. 1992) (quotation omitted).

3 Because the parties move to file documents related to a nondispositive motion, the Court  
4 will apply the lower good cause standard. The Court finds that the parties have provided good  
5 cause for sealing portions of the various documents listed below because they contain confidential  
6 business and proprietary information relating to the operations of Defendant Keurig. *See Apple*  
7 *Inc. v. Samsung Elecs. Co., Ltd.*, No. 11-cv-01846-LHK, 2012 WL 6115623 (N.D. Cal. Dec. 10,  
8 2012); *see also Agency Solutions.Com, LLC v. TriZetto Group, Inc.*, 819 F. Supp. 2d 1001, 1017  
9 (E.D. Cal. 2011); *Linex Techs., Inc. v. Hewlett-Packard Co.*, No. 13-cv-0159-CW, 2014 WL  
10 6901744 (N.D. Cal. Dec. 8, 2014). Specifically, the parties have identified portions of the  
11 unredacted version of the parties’ briefs and exhibits as containing confidential and proprietary  
12 business information. The parties also narrowly tailor their requests to only cover the portions of  
13 the briefs and exhibits that refer directly to confidential business operations or strategy.

14 Accordingly, the Court finds good cause to **GRANT** the motions to seal. Dkt. Nos. 64, 74, 79.

27 //  
28 //

**V. CONCLUSION**

The Court finds that all the requirements of Federal Rule of Civil Procedure 23(a) and Rule 23(b)(3) have been met in this case. Accordingly, the Court **GRANTS** Plaintiff's motion for class certification and certifies the following class for Plaintiff's UCL, CLRA, Breach of Express Warranty, and Unjust Enrichment claims:

All persons who purchased the Products for personal, family or household purposes in California (either directly or through an agent) from June 8, 2016 through the present.

The Court appoints Plaintiff Kathleen Smith as Class representative and Lexington Law Group as Class Counsel in this action. The Court also **SETS** a further case management conference on October 13, 2020, at 2:00 p.m. The parties shall meet and confer and submit a joint case management statement by October 8, 2020. The joint statement should include a proposed case schedule through trial, as well as a brief discussion of any outstanding issues to resolve before trial.

Finally, the Court **GRANTS** the parties' administrative motions to seal, finding good cause to do so. Dkt. Nos. 64, 74, 79.

**IT IS SO ORDERED.**

Dated: 9/21/2020
