**Polyfit Inc. Launches Innovative Closed-Loop Recycling Program for  
Brand Owners, Manufacturers, and Corporations**

Chino Hills, CA – 12/11/2023 – Polyfit Inc., a leader in sustainable plastic solutions, is proud to announce the launch of its groundbreaking Closed-Loop Recycling Program, designed specifically for brand owners, manufacturers, and large corporations. This initiative represents a significant step forward in sustainable manufacturing and compliance with evolving environmental regulations.

The Closed-Loop Recycling Program by Polyfit Inc. offers a comprehensive solution for managing plastic waste. Participating companies can now send their plastic scrap to Polyfit, where it undergoes meticulous sorting and processing. Polyfit then provides detailed reports back to the participants, ensuring transparency and accountability in waste management.

A key feature of the program is the production of Post-Consumer Resin (PCR) "Certified Repro Materials". These materials are created from the recycled scrap and sold back to the original providers, enabling them to manufacture new products from their own recycled materials. This process not only helps in reducing waste but also significantly lowers the carbon footprint associated with new plastic production. For example, we are now getting quite a bit of

LDPE or LLDPE bales from brand owners or producers. We then sort bales, make the PCR LD or LLDPE clear repro from the scrap, sell back to the brand owners or producers. They make new products for the retail corporations. Together, Polyfit, Brand Owners, Producers or Retail Corporations are closing the loop.

By joining this program, companies can stay ahead of the curve in environmental responsibility. Participation aids in compliance with new regulations such as SB 54, SB 261, and SB 253, which are increasingly important in today's eco-conscious market. Moreover, it allows companies to effectively track their plastic waste, demonstrating a commitment to sustainability and enhancing their brand image.

"With our Closed-Loop Recycling Program, we are not just recycling; we are revolutionizing the way companies handle plastic waste," said Hunter, CEO of Polyfit Inc. "This initiative is a testament to our commitment to sustainable practices and our vision for a greener future. We are excited to collaborate with forward-thinking companies to make a tangible impact on the environment."

Polyfit Inc.'s Closed-Loop Recycling Program is more than just a waste management solution; it's a step towards a sustainable, circular economy. Companies participating in this program will not only meet regulatory

requirements but also contribute positively to environmental conservation and sustainable development.
