City of Buenos Aires Partners with CP Group to Open Single Stream Recycling System *System is Most Modern Recycling Facility in the Country of Argentina*

BUENOS AIRES, ARGENTINA (May 6, 2017) – The City of Buenos Aires, in partnership with San Diego-based [CP Group](http://www.cpgroup.com), opened the most advanced recycling system in the country of Argentina. The new 10 TPH residential single stream recycling system began running last October in Villa Soldati, a neighborhood of Buenos Aires. Since then it has helped the city achieve its sustainability goals.

"It's the most modern recycling center in Argentina," announced the Head of Government of Buenos Aires, Horacio Rodríguez Larreta, at the inauguration of the plant in October 2016. "The city has improved a lot in the separation and treatment of recyclable waste," he continued. "4 or 5 years ago nothing was separated. Today, this system is recovering 400 tons of dry materials per day, and that amount is expected to double to 800 tons per day in 2019."

The system features CP separation equipment, including the CPScreen™ for 2D/3D separation, MSS Aladdin™ optical sorter, CP Metering Drum, CP OCCScreen™, and CP Glass Breaker Screen with patented Cam-Discs™.

The recycling system is part of the city's Green Center, a program involved with recovering recyclable materials and providing education about waste treatment processes and its importance in Buenos Aires.

"Throughout the entire process, the City of Buenos Aires has demonstrated environmental leadership as well as a long term commitment to developing a sustainable solution for capturing the valuable recyclables and diverting them from the landfill," says Dirk Kantak, International Sales Director for CP Group. "Between the City of Buenos Aires, and our local Distributor (Coinsa Construcciones), we could not have asked for two better partners on this successful project."

The materials recovery facility (MRF) began running October 2016. During the training and commissioning period, CP Group worked closely with the Spanish-speaking local staff to operate and maintain the MRF.

About CP Group:

CP Group is a team of manufacturers and thought leaders in the waste and recycling industry. CP Group—comprised of CP Manufacturing, Krause Manufacturing, MSS, Inc., and Advanced MRF—provides award-winning recycling system design, manufacturing, retrofits, audits, and consulting. CP Group provides turn-key solutions for mixed waste, residential recycling, commercial and industrial, construction and demolition, and electronic waste applications.
