ER2 Announces Expansion to California

Technology Hardware Lifecycle Company has opened a facility to better service the bay area and Northern California customers

Mesa, AZ (April 2019) - ER2, an expanding technology lifecycle solutions company headquartered in Mesa, AZ, has opened a new facility in West Sacramento, CA. The 25,000-square-foot building will support the growing need in California to service its nationwide clients, particularly those in the healthcare industry. It will also serve to host new customers in ER2's expanding market base.

The expansion follows the company's upward trajectory of growth, which garnered ER2 a ["Fastest Growing 100 Inner City Business"](#) recognition by *Fortune Magazine* last year. ER2 recorded a growth rate of 333.36 percent from 2013 to 2017, and revenues in 2018 that reflected a 25.5 percent increase over the previous year.

ER2 was also distinguished by Fortune for its culture of serving others, garnering the [Chevron/Dorothy A Terrell Community Impact Award](#) for its service to the community and its commitment to developing its employees.

ER2 specializes in helping large companies install new technology while at the same time decommissioning their old hardware to be refurbished or recycled. They recently partnered with major national healthcare providers to manage their IT asset disposal. The opening of the Sacramento facility, located at 2928 Ramco Street in West Sacramento's Southport Business Park, will help the company service the Bay Area and Northern California. The site will serve as a deployment and installation hub for customers' new computer hardware and disposal of their decommissioned e-waste.

Immediate plans for hiring include positions in

- [Logistics and Warehouse Support](#)
- [Truck Driver and Operations Support](#)

"As with all of our business investments we will strive to increase our positive impact on our customers, current and prospective employees, environment and the surrounding communities," explained Chris Ko, ER2's CEO. "We exist to grow a sustainable business that provides the opportunity for others to continuously improve, which leads to truly transforming lives in our community for the better. It's exciting to see that growth take shape in West Sacramento, and soon other cities in the coming year."

"We're excited for this next chapter in our company," Ko added. "Our growth has been a blessing, and we hope to take this opportunity to further our positive impact in our communities locally, nationally and globally."

About ER2:

Formed in 2010, ER2 offers complete technology lifecycle solutions. We provide new hardware to companies through strategic partnerships with major manufacturers, while securely disposing of customers' technology assets and data as an R2-certified electronics recycler.

Headquartered in Mesa, AZ, our business model is founded on the belief in the importance of investing in our people, while serving our partners, community and environment excellently. Our services are nationwide, with additional locations in Memphis, TN; Sacramento, CA; and planned expansion in Texas and Southern California.

Through our unique business model, our partners are enabled to contribute to their local community through our technology divide program, which serves underprivileged families and returning veterans.
