

Ingram Micro's Commitment to Providing Critical IT Asset Disposition Services Has Never Been Stronger

Ingram Micro ITAD's continued investment and ongoing growth brings services closer to clients around the world

IRVINE, Calif. – July 17, 2019 — In light of recent changes to the IT Asset Disposition (ITAD) competitive landscape, Ingram Micro today announced its ongoing commitment to ITAD industry leadership.

As a trusted global enterprise ITAD partner, Ingram Micro reduces the risk, cost, and complexity of securely managing IT assets throughout the service lifecycle. With 31 facilities worldwide, Ingram Micro continues to expand its comprehensive suite of offerings and shorten the chain of custody to bring ITAD services closer to its clients, offering a committed, reliable, and fully certified alternative for companies who must change providers.

“The ITAD industry continues to evolve with varying levels of commitment from competitors around the world. With the addition of 11 new ITAD facilities in the past 18 months alone, our dedication to serving the asset disposition requirements of businesses across the globe has never been stronger,” said Todd Zegers, vice president, ITAD, Commerce & Lifecycle Services, Ingram Micro. “The ability to quickly and easily access ITAD services is a critical business requirement for companies of any size, and our investment and ongoing commitment to our ITAD business gives us the tremendous advantage of ensuring we can anticipate and meet emerging opportunities across the globe.

“We take a broad view of IT Asset Disposition, and you’ll be seeing additional announcements from us in the coming months that reinforce our vision for moving the industry forward in ways that enhance security, visibility, and environmental compliance,” adds Zegers. “An example is the upcoming integration of our well-regarded ITAD asset intelligence system – BlueIQ – with IT Service Management products from leading vendors. The ability to automate lifecycle tracking and offer clients centralized end-to-end asset visibility is another example of Ingram Micro’s ongoing commitment to our clients. We look forward to continuing to meet the ITAD needs of established and emerging businesses throughout the world.”

About Ingram Micro ITAD Services

Ingram Micro Commerce & Lifecycle Services’ ITAD group is a leading worldwide provider of enterprise IT asset disposition (ITAD), lifecycle support services, onsite data destruction, IT asset repair and reuse, and e-waste recycling services. Our services and processes reduce the risk, cost, and complexity associated with securely managing IT assets throughout their lifecycle in compliance with environmental and data security regulations.
