

Smart & Share *by Pellenc ST*

Together Let's Increase Your Industrial Performance

Pellenc ST offers our expertise in **intelligent** waste sorting and offers to **transform your data into resources** with **Smart & Share**.

A real **performance support tool**, Smart & Share has been designed to **continuously analyze** optical sorters and help you **optimize their performance**. It complements existing solutions for overall process supervision and control.

This application provides access to critical operational data (machine status, stream composition, throughput, etc.) to ensure operational continuity and improve the **sorting quality**. Customers also benefit from **customised intelligent alerts** to optimise their **preventive maintenance** and the availability rate of their equipment.

Whether you are a sorting centre or a recycling plant, Pellenc ST works with you to develop a tailor made **business solution** with **dedicated dashboards** utilising this digital service.

To go further, Pellenc ST has set up processes and a **dedicated organisation** to support operators. Our experts provide remote monitoring, alerting and data analysis. Using this information as part of a Global Performance Plan, they recommend **targeted actions** to **maintain your production tool to its full potential**.

This solution is an SaaS connected maintenance applications. It guarantees **secure data, accessible in real time and remotely on all types of media** to satisfy all user profiles.

The Smart & Share is currently being deployed in our main territories to meet the growing requirements of sorting quality and guarantee a sustainable and profitable **Circular Economy**.
