FOR IMMEDIATE RELEASE

Recycling Equipment Manufacturing, Inc Expands Team, Appoints Garry Hojan General Manager

Priest River, Idaho Dec 06, 2019 – Recycling Equipment Manufacturing (REM), a leading provider of OEM recycling and beverage destruction equipment has announced the appointment of Garry Hojan as General Manager. With extensive management experience spanning nearly three decades, Hojan brings valuable leadership to REM's executive team during a period of growth. As General Manager, Hojan will lead operations and direct the company's finance and administrative functions.

"Garry joins REM with a wealth of operational and financial management experience at both mid-sized and large companies," said Mark Blankenship, REM's President. "We are thrilled to have a steady hand at the operational helm as we continue to expand our product line and broaden our customer base."

Prior to joining REM, Hojan acted as CEO for an aerospace manufacturing company. During his sixteen-year tenure he over saw M&A and diversification activities. Beyond operations and finance management, he was responsible for all aspects of strategic planning, manufacturing and customer service.

"REM is experiencing growth with the success of its existing product mix in conveyers and beverage destruction." Said Hojan. "It is a tremendous pleasure to join Mark and the REM team, and I am excited and eager to help further the company's success."

Hojan began his career in electronics engineering before receiving his business education from Barrie College in Barrie, Ontario Canada.
