

FCC Environmental Services Begins Acquisition Growth

FCC has completed its first US acquisition with the recent purchase of Premier Waste Services, LLC. Premier is a commercial solid waste provider covering the Dallas/Fort Worth metro area for more than 20 years. The company is servicing over 4,000 contracts with a fleet of more than 50 vehicles. The company's history, paired with their strong workforce and customer focus made this a great fit to expand the company's footprint in Texas.

"This growth is a key driver for our company as we continue to expand our US presence and work to synergize our operations. Thus far, all of our growth has been organically driven and we are excited about this further lever to grow our company and embrace proven service providers like Premier." said Inigo Sanz, CEO of FCC Environmental Services.

FCC continues its steady growth in the US, where it already has more than 600 vehicles, 1,000 employees and a backlog of more than \$3 billion.
