

MACHINEX OPENS NEW OFFICE IN PHOENIX INVESTING IN A STRONG REGIONAL PRESENCE

FOR IMMEDIATE RELEASE

May 6th, 2022 — Machinex is pleased to announce the opening of its new office located in Phoenix, Arizona. Reinforce its presence on the West Coast, increase customers' support and service in the area became a necessity as multiple major projects have been awarded in the area.

Expanding to the West Coast

Machinex has seen significant growth in the number of existing and future projects on the West Coast and as such it was a good time to invest in a stronger regional presence. With two sizeable projects installing in Phoenix, AZ, it was an easy decision to locate our newest US office close by to support our current and future customers. Furthermore, our growth comes with the opportunity to increase staffing, and we are currently welcoming and recruiting new team members in various positions including, but not limited to, Sales, Engineering, Project Management, Electrical & Automation, Millwrights, Administration, and more.

Thanks to its experience as a world leader manufacturer and equipment provider, Machinex now has the desire to keep developing the western area with extended services. "Machinex takes pride in our team of employees and making sure that our customers Experience Results with both equipment and the services we provide. Growth definitely comes with its challenges, but we are up to the task and look forward to the next step in our voyage towards improving our position in Waste & Recycling markets." Says Chris Hawn, CEO at Machinex Technologies.

Don't Miss Machinex Immersive Experience at Waste Expo

During Waste Expo, visitors will experience an immersive virtual modern MRF visit. A full system walk-through will take you on the journey towards the modern MRF design while providing details about sorting equipment integrated. Come visit us at booth #1405!
