Nordson BKG and FIMIC to Jointly Present New Recycling Solutions at K 2025

Münster, NRW, Germany – June, 2025 – At this year's K trade fair in Düsseldorf, Germany, - the world's leading event for the plastics and rubber industry - Nordson BKG GmbH, part of Nordson Corporation's (Nasdaq: NDSN) Polymer Processing Systems (PPS) division, and a global leader in melt delivery, and pelletizing solutions, and FIMIC Srl., a leading provider of innovative melt filtration technology, will unveil a newly developed collaborative innovation.

The two companies—internationally recognized specialists in their respective fields—have combined their expertise to tackle key challenges in plastics recycling: melt filtration, pelletizing, and system integration. The result is a set of comprehensive solutions that set new standards ecologically and economically.

Visitors to the Recycling Hall (Hall 9) will find the two partners at opposite booths – a symbolic and practical reflection of their close collaboration. This proximity allows attendees to explore the entire process chain.

“Our partnership with FIMIC demonstrates how collaborative development can set new standards – especially when it comes to the future viability of plastics recycling,” says Christian Schröder, Global Segment Manager Recycling, Nordson BKG GmbH.

“Together, we are proving that recycling is not only essential but also technologically exciting and economically viable,” adds Erica Canaia, CEO, FIMIC Srl.

The official presentation of these new concepts will occur during K 2025 from October 8 to 15 in Düsseldorf. Industry professionals are warmly invited to visit both booths and engage with the expert teams.

Visit Nordson BKG in Hall 9, booth no. D09, and FIMIC in booth no. D18 at K 2025.

###

About FIMIC Srl.

FIMIC Srl. is a leading manufacturer of self-cleaning melt filtration systems for the plastics recycling and extrusion markets. Focusing on innovation and sustainability, FIMIC is dedicated to providing customers with cutting-edge solutions for effective and efficient melt filtration. FIMIC's state-of-the-art technology and customer-focused approach have positioned them as a trusted partner in the global plastics industry.

About Nordson BKG GmbH

Nordson BKG GmbH is part of Nordson's Polymer Processing Systems division. Nordson BKG GmbH provides customers with engineered components to melt, homogenize, filter, meter, and give shape to plastic. Nordson Corp. leverages the collective plastics industry experience from strategic acquisitions to offer a uniquely broad portfolio of industry-leading technologies. Nordson delivers a full range of precision melt stream products—from filtration systems, pumps, and valves to pelletizing systems to meet the constantly evolving needs of the polymer industry.

Nordson provides customers with local technical sales, service, and remanufacturing capabilities through sales organizations and regional manufacturing. To learn more, visit <http://www.nordsonpolymerprocessing.com>, <https://www.linkedin.com/company/nordson-polymer-processing-systems/> or www.facebook.com/NordsonPPS.

About Nordson Corp.

Nordson Corp. is an innovative precision technology company that leverages a scalable growth framework through an entrepreneurial, division-led organization to deliver top-tier growth with leading margins and returns. The Company's direct sales model and applications expertise serve global customers through various critical applications. Its diverse end market exposure includes consumer non-durable, medical, electronics, and industrial segments. Founded in 1954 and headquartered in Westlake, Ohio, the Company has operations and support offices in over 35 countries. Visit Nordson at www.nordson.com, www.twitter.com/Nordson_Corp or www.facebook.com/nordson.
