

Mamoth and Fought's Disposal Services Partner to Offer New Mamoth E-Waste Recycling Drop-Off Bins

Berwick, PA — Local residents now have an easier way to recycle their old electronics thanks to a new partnership between Mamoth and Fought's Disposal Services, Inc. The two companies have joined forces to bring convenient e-waste drop-off bins to the community, offering a simple and sustainable way to dispose of unwanted tech responsibly.

One drop-off bin will now be available at each of the following locations:

- **Fought's Disposal Services, Inc.** — 2705 Snyder Ave., Bloomsburg, PA 17815
- **Fought's Disposal Services Satellite Location** — 123 W 11th Street, Berwick, PA 18603

Residents can bring in old electronics like phones, computers, and small devices to help keep hazardous waste out of landfills and support a greener community.

"We're excited to make sustainable tech recycling more accessible for local residents," said Cody Meredith, CRO of Mamoth, "By partnering with Fought's Disposal, we're making it easier for everyone to take part in protecting our environment."

The new e-waste bins do more than just collect electronics. Mamoth's program includes advanced sustainability tracking, reporting the total weight of items recycled by category. This helps measure environmental impact, supports ESG goals, and even helps communities qualify for state and green funding opportunities.

For Fought's Disposal Services, the initiative adds another way to serve the community while supporting environmentally friendly practices.

Mamoth is a sustainability technology company helping organizations and communities turn environmental goals into measurable action. From e-waste recycling programs to ESG reporting, Mamoth empowers people to make smarter, greener choices every day. Learn more at www.mamothitad.com.
