US Plastics Recovery LLC, an established Plastics Recycling business in Georgia is announcing they have increased the size of their processing facility by 50 percent and has relocated into a 75,000 sq. ft building located in Lawrenceville, GA. US Plastics Recovery (USPR) has been in business for 11 years and is one of the leading recycling companies in the southeast, servicing clients throughout the Country.

US Plastics Recovery has added new equipment, including two new Vecoplan shredders to partner with their existing 70" 250 HP Vecoplan shredder. US Plastics Recovery has two high capacity grinders, a wet grinding line, a screener with dust collection to separate pellet and talc powder, elutriation systems, magnets on all of the shredders and grinders and a sink float line to separate and clean certain polymers. Steve Hogan, CTO says, "we are planning on adding an additional sink float line and silo blender within the next six months". US Plastics Recovery currently process and handle over 1.5 million pounds of plastic scrap a month. US Plastics Recovery forecasts they will be able to process over 2.5 million pounds a month with the new equipment being added to the line.

For information and an evaluation of your recycling or toll grinding needs, please call [770-582-9616](tel:770-582-9616) or email, service@usprecovery.com

With Best Regards,
Steven Hogan
