

MRC JOINS TERRA’S EXPANDS “DONE WITH IT” PROGRAM

NASHVILLE, TN (March 5, 2021) – While the coronavirus has disrupted recycling programs nationwide, [TERRA’s Done with IT](#) mail-in program continues to provide electronics recycling to those impacted the epidemic.

Today, TERRA announces [Midwest Recycling Center \(MRC\)](#) as joined the program and will provide certified recycling services from their R2 certified facility in Park Hills, MO.

Done with IT serves the entire continental U.S. as well as Canada with recycling options from its international network of e-Stewards and Certified R2 facilities.

“While the electronics recycling industry has been deemed essential, many retail and government e-waste recycling programs have been suspended,” said Steven Napoli, President & CEO of TERRA. “In addition to general e-waste recycling, Done with IT helps close the digital divide with refurbishment programs sponsored by major league sports teams.

In addition to being simple, secure and sustainable, Done with IT also partners with professional sports teams and non-profit organizations to return refurbished devices to students that lack the proper equipment for remote learning.

“Most people don’t understand the importance and value of choosing a Certified recycler when retiring their used electronics,” said Greg Cooksey, Director of Business Development/Compliance Officer at MRC “We specialize in maximizing the value of retired technology and devices while ensuring both data security and sustainability.”

“TERRA and Done with IT are actively seeking more certified recycling partners like MRC,” Napoli added.

###

TERRA & Done with IT

TERRA is dedicated to diverting used electronics to the care of Certified Recyclers to maximize reuse and the recycling of natural resources.
