Liquid Technology Increases its Operations in New York

New Facility Adds 31,000 SQ FT to Brooklyn Headquarters

BROOKLYN, NY– Liquid Technology, a best-in-class IT asset disposition service (ITAD) provider, has expanded its New York facilities this October. The new space is 31,000 sq ft and increases the organization's footprint in the historical Brooklyn Army Terminal to 62,000 sq ft. The additional space is to support the company's steady growth. In 2019, Liquid Technology opened a Midwest facility in Bensenville, IL. Both facilities are eStewards certified.

"This year, we celebrated our 20th anniversary. We are currently employing 90 people. Our new space gives us the ability to grow our workforce by 30%," explained Managing Partner, Richard Greene.

"Now is a pivotal time for the circular economy. Enterprises have a newfound focus on social responsibility and environmental impact. We see this through companies' carbon neutral pledges. The need for our services grows in lockstep with the increase in e-waste," Greene said of Liquid Technology's growth.
